RE: RP3 Informational Teleconference call set for Tuesday, July 21st
Please RSVP by Friday July 17th

The American Public Power Association (APPA) offers a Reliable Public Power Provider (RP3) program which measures and encourages public power systems to demonstrate basic proficiencies in four disciplines; *Reliability, Safety, Training, and System Improvements*. Utilities who successfully meet the guidelines in each of the four disciplines receive a tremendous amount of recognition for their achievements and hard work.

Therefore, MEUW would like to offer an informational teleconference call to be held on **Tuesday July 21, 2009 at 10:00 AM** to provide information about the program and offer instruction on how to best complete the application for recognition. The application deadline is September 30, 2009.

The teleconference call is open to any MEUW member interested in learning more about the program. We will be joined on the call by **Mike Hyland, APPA's Vice President of Engineering Services**. In addition, we hope to have representation by personnel from **Kaukauna, Oconomowoc, Two Rivers, Richland Center and Stoughton** who have already completed and received RP3 awards. It is important to learn what to expect from the experience and what better way to learn about the process but from those who have successfully achieved the honor.

The call should last 45-60 minutes and will include a short informational presentation followed by a testimony and question/answer period. There is no charge for the teleconference, but we do need to know which personnel from your utility will be "attending" the call. If your utility is interested in learning more about the APPA RP3 Program, please reply by FAXING this page indicating the names and titles of those who will be participating on the call to **Shari Baumann at 608-837-0206 no later than Friday July 17th**. We will email confirmations on Monday July 20th with the toll free number and passcode to those who have registered.

REGISTRATION

MEUW Member RP3 Informational Teleconference Call, **Tuesday, July 21, 2009 at 10:00 AM**

The following individuals from _____ Utility plan to participate in the above mentioned teleconference call:

<u>Name</u>	<u>Title</u>	<u>Email Address</u>
