Please Consider Signing Representative Hultgren and Ruppersberger’s Dear Colleague Letter in Support of Preserving the Tax-Exempt Status of Municipal Bonds

House Municipal Finance Caucus leaders Randy Hultgren (R-IL) and Dutch Ruppersberger (D-MD) are circulating a letter in support of municipal bonds. We ask that you consider adding your signature to the letter.

The current-law tax exemption for municipal bonds is incredibly important to Wisconsin municipal utilities. Public power utilities in the United States finance roughly $11 billion in new projects every year with tax-exempt municipal bonds and municipal utility customers benefit from the tax savings in the form of lower electric and water rates. WPPI Energy alone would incur roughly $1.3 million more in annual debt service if WPPI’s outstanding bonds were not tax-exempt. That cost would be directly passed to WPPI Energy member utilities, which in turn would need to recover those increased costs from electric customers.

Repealing the tax-exempt status of municipal bonds would increase in higher out of pocket costs for a broad array of public goods including electricity.

Congressional offices wishing to join the letter should contact either:

- Bill Hulse (Rep. Hultgren) at Bill.Hulse@mail.house.gov (202-225-2976); or
- David Heitlinger (Rep. Ruppersberger) at David.Heitlinger@mail.house.gov (202-225-3061).

Thank you for your consideration.

Please find a copy of the letter on the reverse side of this page.
Dear Chairman Brady and Ranking Member Neal:

As Congress considers tax reform and infrastructure financing, we, the undersigned, write to express our strong support for an already potent tool already in hand – the tax-exempt municipal bond. For more than a century, states and local governments have depended on this reliable and efficient means of financing.

Nearly two-thirds of core infrastructure investments in the United States are financed with municipal bonds. In 2015 alone, more than $400 billion in municipal bonds were issued to finance the projects that touch the daily lives of every American citizen and business. They are the roads we drive on, schools for our children, affordable family housing, water systems that supply safe drinking water, courthouses, hospitals and clinics to treat the sick, airports and ports that help move products domestically and overseas, and, in some cases, the utility plants that power our homes, businesses, and factories. These are the pro-growth investments which spur job creation, help our economies grow, and strengthen our communities.

A combination of local control and local responsibility makes municipal bonds an incredibly effective and efficient tool. Voters throughout the country overwhelmingly support tax-exempt municipal bonds, which are either approved by locally-elected officials or directly through bond referenda – fiscal federalism at its finest. This must help explain why the default rate is less than 0.01%. Federal tax exemption reduces the cost of issuing municipal bonds, but it is these voters who will pay the interest and principle on this debt. As a result, over the last decade overall state and local borrowing has actually declined in proportion to the economy, while still financing more than $2 trillion in new infrastructure investments. And, if simply left alone, municipal bonds likely will finance another $3 trillion in new infrastructure investments by 2026.

Furthermore, millions of Americans depend on municipal bonds for their economic security, and invest in them because of their low-risk nature. Nearly three-quarters of individual investors earn less than $200,000 per year and more than three-quarters are 55 or older. Businesses also rely on municipal bonds as a safe, stable, long-term investment.

In conclusion, changes to the tax-code should recognize the vital role of tax-exempt municipal bonds. Any changes under consideration to the tax exempt status that would increase the cost of financing for states and local government should be provided very careful consideration. We believe the current tax-exempt status contributes to efficient economic growth that benefits all Americans.

Sincerely,
