

## **Water Plant Operator**

Menasha Utilities is accepting applications for the position of Water Plant Operator. This position is responsible for the operation of water pumping equipment, purification processes, and using related equipment on an assigned shift.

Water Plant Operators are responsible for making minor repairs and adjustments to chemical feed equipment, pumps, and other water treatment processes as required. Work includes inspection and operation of motors, pumps, meters, filters, GAC contactors, UV reactors and other equipment. Work is performed using independent judgment and taking corrective action to solve problems. Work is reviewed by supervisors through observation and results obtained.

Examples of work include: Control pressure and flow of water in the distribution system from HMI data, adjust chemical dosages, backwash filters and GAC contactors, operate pumps, receive chemical deliveries, read gauges, record scale weights, collect samples, perform lab testing, operate valves, adjust flows, and operate equipment using SCADA software. Conducts visual inspections of equipment and grounds; performs preventive maintenance; performs custodial work cleaning and maintaining facilities and grounds; operates emergency generators and high-lift pumps.

Interested candidates can apply by October 22 at
