

## **Menasha Utilities - Water Plant Maintenance Technician/Operator**

Menasha Utilities is looking for a Water Plant Maintenance Technician/Operator to work in a community serving 5,000 water customers. This position is responsible for the maintenance and repair of electrical equipment, instrumentation, and water treatment equipment at the water plant and related water utility buildings.

Work involves troubleshooting, conducting preventative maintenance, plumbing, wiring, and installing pumps, chemical feeders, mixers, analyzers, programmable controllers, drives, and computers. This position is responsible for facility grounds and maintenance of water utility buildings, climbing water towers, and entering confined spaces. Work includes performing the duties of Water Plant Operator on a relief basis. The Menasha water plant has an operator working continuously. Work is performed independently within established policies, procedures, and technical guidelines and is reviewed by the Water Utility Manager through conferences, reports, and results obtained.
