

Energize Our Next Generation

There are 81 municipal electric utilities in Wisconsin that serve both residential and commercial customers throughout the state. Our communities can count on our power ... and our employees can count on having a rewarding future. Find out some benefits of choosing a career in public power.

Why Encourage Students to Explore Careers in Public Power?

Public power utilities are distinctly different from investor-owned utilities because they are fully accountable to their customers. Municipal utilities employ thousands of people in jobs that combine public service with rewarding career opportunities. **Public power people are invested in their communities.**

Working for a electric municipal utility is about more than a competitive paycheck and excellent benefits. It's about being part of a crew that's more like a family ... and going above and beyond to win the respect and appreciation of the community. **Public power people are hometown heroes.**

A career as a line worker may be the right fit for those who like to work with their hands ... and enjoy a little adventure. When severe weather rolls in or the lights go out, line workers mobilize. Their jobs are unlike any other – chasing storms, climbing poles, understanding the intricacies of the energy grid, and always being prepared. **Public power people are energized.**

Wisconsin's municipal electric utilities are willing to invest in their employees' professional development and will recognize and reward excellence with career advancement. Some utilities offer scholarship programs for line workers and some also offer apprenticeship programs. Many municipal utilities will train on the job. **Public power people are valued.**

As an apprentice line worker, journeyman, or crew leader, employees can expect to earn a competitive salary plus overtime. Beyond the pay, employees enjoy benefits that include medical and dental insurance, paid vacation, and a retirement program. **Public power people are well compensated in today's competitive market.**

An ever-increasing number of municipal utility employees in Wisconsin are over age 50. That means utilities are recruiting for a wide range of jobs, such as electric line workers, clerical assistants, finance managers and accountants, and many others. **Public power people are in demand.**
